6	Pos_Fun_0001	Simple daily sentence	S	api gedhara inne.	අපි ගෙදර ඉන්නේ.	අපි ගෙදර ඉන්නේ.	Pass	The Singlish input is grammatically correct and uses standard character mappings.	· Basic Singlish → Sinhala transliteration
7								The Sinhala output preserves the original sentence meaning without distortion.	· Simple present tense sentence
8								Sinhala spelling, word separation, and punctuation are correctly generated.	· Short input length (S ≤ 30 characters)
9									· Accuracy validation
10	Pos_Fun_0002	Greeting short	s	suba dhavasak!	සුබ දවසක්!	සුබ දවසක්!	Pass	· Greeting intent is clearly identified and preserved in Sinhala.	Greeting detection
11								· The exclamation mark is retained correctly.	· Punctuation handling
12								· Sinhala greeting is culturally and linguistically accurate.	· Short sentence processing
13									· Natural language correctness
14	Pos_Fun_0003	Short interrogative	s	oyaa ennee kavadhdha?	ඔයා එන්නේ කවිදද?	ඔයා එන්නේ කවිදද?	Pass	· Question structure is correctly identified.	· Interrogative sentence handling
15								· The Sinhala question mark is placed correctly	· Question punctuation
16								· Verb tense and pronouns are accurately converted	· Pronoun conversion
17									· Short conversational input
18	Pos_Fun_0004	Short command	S	LaGAta enna	ලගට එන්න	ලගට එන්න	Pass	Imperative form is correctly preserved	· Command/imperative sentence conversion
19								Sinhala command structure is natural and clear.	Action verbs
20								Final punctuation is accurately applied.	· Short instruction text
21									· Syntax correctness
22	Pos_Fun_0005	Joined word input	S	api gedhara innee.	අපි ගෙදර ඉන්නේ.	අපි ගෙදර ඉන්නේ.	Pass	System correctly separates joined Singlish words.	· Word segmentation handling
23								· Sentence meaning remains unchanged.	· Informal Singlish patterns
24								· Sinhala spacing and grammar are correct	· Sentence normalization
25									Accuracy validation
26	Pos_Fun_0006	Compound sentence	M	api gamata yanna hadhapu eka hari lassanayi, namuth kaalaya madhi vuNaa.	අපි ගමට යන හදපු එක හරි ලස්සනයි, නමුත් කාලය මැදි වුණා.	අපි ගමට යන හදපු එක හරි ලස්සනයි, නමුත් කාලය මැදි වුණා.	Pass	· Compound structure is preserved accurately	Compound sentence handling
27								· Comma usage is correct in Sinhala.	Punctuation preservation
28								· Contrast connector ("නමුත්") is correctly translated.	
29								·	
30	Pos_Fun_0007	Complex sentence	M	ubata puluvan nam api vena dhavasaka hambelaa kathaakaranvadha ban?	උබට පුලුවන් නම් අපි වෙන දවසක හම්බෙලා කතාකරමුද බන්?	උබට පුලුවන් නම් අපි වෙන දවසක හම්බෙලා කතාකරමුද බන්?	Pass	· Informal Sinhala tone is preserved correctly	Informal conversational language
31								· Question intent remains unchanged	Question sentence structure
32								· Slang is translated into meaningful Sinhala without distortion	Colloquial usage
33									Real-world spoken language patterns
34	Pos_Fun_0008	Negative statement	S	mata adha vaeda karanna puLuvan karook naee.	මට අද වැඩ කරන්න පුළුවරක් නෑසේ කෑ	මට අද වැඩ කරන්න පුළුවරක් නෑසේ කෑ	Pass	· Negation is clearly identified and preserved	Negative sentence handling
35								· Verb phrase is correctly converted.	Modal verb conversion
36								· Sinhala sentence flows naturally	Sentence polarity detection
37									Functional accuracy
38	Pos_Fun_0009	Polite request	S	karuNaakaralaa methanin ayin vennaa puluvandha	කරුණාකරලා මෙතනින් අයින් වෙන්න පුලුවන්ද	කරුණාකරලා මෙතනින් අයින් වෙන්න පුලුවන්ද	Pass	· Politeness marker is correctly translated	Polite request handling
39								· Request intent remains respectful	Courtesy expressions
40								· Sinhala grammar matches polite usage	Imperative-softening patterns
41									Conversational accuracy
42	Pos_Fun_0010	Informal phrasing	S	adoo machQQ adha mokadhdha plan eka?	අඩෝ මචO> අද මොකද්ද plan එක?	අඩෝ මචO> අද මොකද්ද plan එක?	Pass	· Informal address terms are preserved correctly.	Informal/slang language
43								· Sentence tone remains casual.	Casual question detection
44								· Sinhala slang is meaningful and readable.	Mixed Sinhala–English usage
45									Youth conversational style
46	Pos_Fun_0011	Past tense	M	api iyee office gihiQQ meeting eka attend kal.aa.	අපි ඉයේ office ගිහිO> meeting එක attend කළා.	අපි ඉයේ office ගිහිO> meeting එක attend කළා.	Pass	· Past tense verbs are accurately converted	Past tense handling
47								· Event sequence is preserved.	Mixed-language content
48								· English technical terms remain unchanged.	Event narration
49									Temporal accuracy
50	Pos_Fun_0012	Future tense	S	api passee kathaa karamu.	අපි පස්සේ කතා කරමු.	අපි පස්සේ කතා කරමු.	Pass	· Future intent is preserved.	Future/suggestion expressions
51								· Verb phrase is natural in Sinhala.	Simple conversational planning
52								· Sentence is concise and correct	Short sentence handling
53									Accuracy validation
54	Pos_Fun_0013	Brand preserved!	M	ubata puluvan nam giya sathiye karapu not eka mata evanavadha?.	උබට පුලුවන් නම් ගිය සතියෙ කරපු නෝට් එක මට එවනවද?.	උබට පුලුවන් නම් ගිය සතියෙ කරපු නෝට් එක මට එවනවද?.	Pass	· Conditional phrasing is preserved.	Conditional requests
55								· Request remains polite and clear	Informal polite language
56								· Sinhala nouns are correctly formed	Past-time references
57									Conversational realism
58	Pos_Fun_0014	Place preserved	S	vahaama methanin idhaganna	වහාම මෙතනින් ඉගනන්න	වහාම මෙතනින් ඉගනන්න	Pass	· Urgency word ("වහාම") is correctly translated.	Urgent commands
59								· Command tone is preserved.	Action instructions
60								· Sinhala spelling is accurate	Short imperative sentences
61									Command semantics
62	Pos_Fun_0015	Time format	S	meeting eka 10.45 AM ta patan gannavaa.	meeting එක 10.45 AM ට පටන් ගන්නවා.	meeting එක 10.45 AM ට පටන් ගන්නවා.	Pass	· Numeric time format is preserved	Time expressions
63								· AM notation remains unchanged.	Numeric + text mix
64								· Sinhala particles are correctly applied.	Formatting preservation
65								· N	Real-world scheduling text
66	Pos_Fun_0016	Abbreviations	S	mata online payment ekak karanna puluvandha'	මට online payment එකක් කරන්න පුලුවන්ද	මට online payment එකක් කරන්න පුලුවන්ද	Pass	Modal request is correctly handled.	Online/payment terminology
67								· English technical term is preserved.	Question handling
68								· Sentence remains polite and clear.	Mixed-language usage
69									Functional accuracy
70	Pos_Fun_0017	Repeated emphasis	L	oyaanda jayawee mhyema mathOnda haema ekama avasThaavak vidhiyata gamna. asaarThaka venna oone naee kiyalaa baya venna epaa. arannuNa	ඔයාන්ද ජයවීමේ මහත්මයා මතOන්ද හැමෝම එකම අවස්ථාවක් විදියට ගමන්. අනර්ථක වෙන්න ඕනෙ නැහැ කියලා බය වෙන්න එපා. අරන්නුණ	ඔයාන්ද ජයවීමේ මහත්මයා මතOන්ද හැමෝම එකම අවස්ථාවක් විදියට ගමන්. අනර්ථක වෙන්න ඕනෙ නැහැ කියලා බය වෙන්න එපා. අරන්නුණ	Pass	· Long input is processed without truncation	· Long input handling (L)
71								· Emotional tone is preserved.	Paragraph-level conversion
72								· Sinhala paragraph is grammatically consistent.	Emotional language accuracy
73									Robustness validation
74	Pos_Fun_0018	conversational text/Largeformat	M	oyaata karanna vaedak naethnam maath ekka yamudha? ah hari yamu.	ඔයාට කරන්න වැඩක් නැත්නම් මෙත් එක්ක යමුද? අහ් හරි යමු.	ඔයාට කරන්න වැඩක් නැත්නම් මෙත් එක්ක යමුද? අහ් හරි යමු.	Pass	· Casual invitation tone is preserved.	· Conversational flow
75								· Question and response are both accurate	Informal invitations
76								· Sinhala flow remains natural.	Question + response pattern
77									Spoken language realism
78	Pos_Fun_0019	Long formal text	L	oyaa dhanuvadha aaha town eka hari busy kiyalaa? traffic nisaa hari amaaru vuNaa. bus eka late vuNa nisaa api coffee shop ekakata giahiQQ	ඔයා දුම්මරුද ආදා town එක හරි busy කියලා? traffic නිසා හරි අමාරු වුණා. bus එක late වුණ නිසා අපි coffee shop එකකට ගිහිංලා	ඔයා දුම්මරුද ආදා town එක හරි busy කියලා? traffic නිසා හරි අමාරු වුණා. bus එක late වුණ නිසා අපි coffee shop එකකට ගිහිංලා	Pass	· Multi-sentence narrative is preserved.	· Story-style input
79								· Cause–effect relationships remain intact.	Multi-sentence handling
80								· Mixed English words do not affect meaning.	Context preservation
81									Medium–long input robustness

	A	B	C	D	E	F	G	H	I
82	Pos_Fun_0020	Multi-line input	M	adha office yanna baehae.weather eka hari narakayi.eka oyaata kiyanna ona kiyalaa hithuNee.	අද office යන්න බැහැ.weather එක හරි නරකයි.එක ඔයාට කියන්න ඕන කියලා හිතුනේ නෑ.	අද office යන්න බැහැ.weather එක හරි නරකයි.එක ඔයාට කියන්න ඕන කියලා හිතුණේ නෑ.	Pass	· Line breaks are handled correctly.	Multi-line text handling
83								· Sentence separation is preserved.	Formatting robustness
84								· Meaning remains unchanged.	Sentence boundary detection
85									UI consistency
86	Pos_Fun_0021	Currency & units	S	mee item eka Rs. 2450 venavaa saha 2 kg vagee weight ekak thiyenavaa.	මේ item එක Rs. 2450 වගෙයි සහ 2 kg වගේ weight එකක් තියෙනවා.	මේ item එක Rs. 2450 වගෙයි සහ 2 kg වගේ weight එකක් තියෙනවා.	Pass	· Currency format remains unchanged	Numeric data handling
87								· Units of measurement are preserved.	Currency symbols
88								· Sinhala grammar integrates numeric values correctly.	Measurement units
89									Practical transactional text
90	Pos_Fun_0022	Slang	M	eLa machQQ adha trip eka supiriyak vuNaa. music, food okkoma patta. api ithQQ aaye edhdhai enakota hari lassanayi kiyalaa hithuNaa.	එළා මචං අද trip එක සුපිරියක් වුණා. music, food ඔක්කොම පට්ටා. අපි ඉන්නං ආයෙ එදිදී එකෙකට හරි ලස්සනයි කියලා හිතුණා.	එළා මචං අද trip එක සුපිරියක් වුණා. music, food ඔක්කොම පට්ටා. අපි ඉන්නං ආයෙ එදිදී එකෙකට හරි ලස්සනයි කියලා හිතුණා.	Pass	· Slang terms are meaningfully converted	Colloquial Sinhala
91								· Informal tone is preserved	Informal storytelling
92								· Sentence flow remains natural.	Youth slang patterns
93									Robust conversational handling
94	Pos_UI_0002	Input text clears and updates output immediately	S	api passee kathaa karamu.	අපි පස්සේ කතා කරමු.	අපි පස්සේ කතා කරමු.	Pass	· Future tense meaning is accurately preserved in Sinhala.	Functional transliteration correctness
95								· Word separation and Sinhala verb formation are correct.	Future tense sentence handling
96								· No unwanted English or incorrect characters appear in the output	Verb conjugation accuracy
97									S (≤30 characters)
98	Pos_Fun_0024	Plural pronouns	S	oyanalaa passee api ekka join venna puLuvan.	ඔයාලා පස්සේ අපි එක්ක join වෙන්න පුළුවන්.	ඔයාලා පස්සේ අපි එක්ක join වෙන්න පුළුවන්.	Pass	· Plural pronouns are correctly converted.	Plural pronoun handling
99								· Sentence structure remains clear.	Group references
100								· Verb agreement is accurate.	Sentence agreement
101									Conversational accuracy
102	Pos_Fun_0025	Long polite request	M	oyaata puLuvannam mee document tika review karalaa adha evening eka mata feedback ekak evanna.	ඔයාට පුළුවන්නම් මේ document එක review කරලා අද evening එක ඔව් feedback එකක් එවන්න.	ඔයාට පුළුවන්නම් මේ document එක review කරලා අද evening එක ඔව් feedback එකක් එවන්න.	Pass	· Politeness level is preserved	Formal polite requests
103								· Multi-clause request is accurately converted	Long sentence handling
104								· Sinhala sentence remains professional and clear.	Professional communication
105									Real-world work scenarios
106	Neg_Fun_0001	Random alphabets mapped incorrectly	S		ඔබේ සෙල්ලං		Fail	· The system does not correctly identify meaningless alphabet sequences	This test does not cover validation of partially meaningful Singlish words
107								· Translator produces an unrelated Sinhala sentence	This test does not cover system behavior for mixed alphabet + number input
108								· Output does not reflect input intent or structure	This test does not cover UI error message display for empty input
109								· Indicates lack of invalid-input filtering	This test does not cover language detection fallback mechanisms
110	Neg_Fun_0002	Gibberish word produces valid sentence	S	mm knnd	ඔබේ සත්සඳු	mm ස්කන්ධේ	Fail	· Gibberish input is incorrectly treated as meaningful text	This test does not cover spelling correction logic for near-valid Singlish words
111								· Generated output is contextually unrelated	This test does not cover grammatical accuracy of interrogative sentences
112								· No validation to reject unsupported word patterns	This test does not cover confidence scoring or ambiguity handling
113								· Accuracy of intent detection is compromised	This test does not cover semantic intent validation before translation
114	Neg_Fun_0003	Invalid input returns greeting	M	mm htnh oya hodin ati kyl nkd mn iye ra ntk hinayk dakka	ඔබේ හිතන්න) ඔයා හොඳින් ඇති කියලා මගිනෙදා එහෙත් ඔබේ රටක හිනයක් දක්කා	mm හිටින්න ඔයා හොඳින් අටි කල්ල මිනේ මිත් ඉගය ෆ වගින් හිනක්කන් එන්න	Fail	· System incorrectly assumes conversational intent	This test does not cover correctness of tense conversion
115								· Output greeting is not derived from input	This test does not cover punctuation normalization behavior
116								· Invalid text is not flagged or ignored	This test does not cover multilingual sentence boundary detection
117								· Sentence reconstruction logic is inaccurate	This test does not cover handling of excessive whitespace inside text
118	Neg_Fun_0004	Random characters interpreted as action	M	?!@@##	බිඳලු වැරදි කරගමු)	?!@@##	Fail	· Special characters are misinterpreted as actions	This test does not cover symbol filtering or sanitization logic
119								· Output sentence lacks logical source	This test does not cover system response for mixed symbols and letters
120								· Input sanitization is insufficient	This test does not cover security validation for special characters
121								· System fails to reject unsupported symbols	This test does not cover UI warning or error prompts for invalid symbols
122	Neg_Fun_0005	Keyboard mash gives command	L	oyga magei athara thibba sambadhya mama metnin natara kmv nkd oy kiya ck hitka inn puliva kenk nme e ns mm mtnn ntr wnvkmti vdyt jvt wnn	ඔබයන්ගෙ ගෙදර තියෙන සම්බන්ධතාවයක් මගේ මේතන්න නතර කරන්න කමක් නැද්ද කියා කියන්න එක හිතක පුලිවන් කෙනෙක් නෙමෙයි ඒ නිසා මගේ මේතන්න නතර වෙන්න තමයි විදිහටවා මේක වැරදි	ඔයගේ ගෙදර අතරක් තියෙන සම්බන්ධතාවයක් මගේ මේතන්න නතර කරන්න කමක් නැද්ද කියා කියන්න එක හිතක පුලිවන් කෙනෙක් නෙමෙයි ඒ නිසා mm මේවගේ කදු ගණිතමිටි විදිහටවා මේක වැරදි	Fail	· Long meaningless input is incorrectly normalized	This test does not cover accuracy of long-form sentence segmentation
123								· Output falsely represents a valid emotional statement	This test does not cover emotional tone or sentiment preservation
124								· No confidence scoring or uncertainty handling	This test does not cover spelling normalization consistency
125								· Over-correction leads to misleading translation	This test does not cover performance under very long text inputs
126	Neg_Fun_0006	Gibberish Input Stress Test	S	10.45t aharenn	10.45ta ඇතැංරන්න	10.45t ඇතැංරන්න	Fail	· Mixed numeric and text input is partially misread	This test does not cover numeric + text formatting rules
127								· Command intent is guessed rather than validated	This test does not cover time format validation logic
128								· Output formatting inconsistencies observed	This test does not cover error handling for malformed time expressions
129								· Stress input handling is unreliable	This test does not cover real-time incremental translation accuracy
130	Neg_Fun_0007	Emoji input converted to sentence	S	😂🔥	ඒක හරි සොඳුයි	😂🔥	Fail	· Emojis are wrongly interpreted as positive sentiment	This test does not cover emoji-to-emotion mapping accuracy
131								· No defined emoji-to-text mapping exists	This test does not cover mixed emoji and text interpretation
132								· Output sentence is assumed, not translated	This test does not cover Unicode normalization handling
133								· Semantic accuracy is not preserved	This test does not cover accessibility or screen-reader behavior
134	Neg_Fun_0008	iNumbers misinterpreted as sentence	S	123456	අපි හෙට යමු	123456	Fail	· Numeric-only input is treated as intent	This test does not cover numeric-only input rejection logic
135								· Output sentence is unrelated to data	This test does not cover number-to-word conversion rules
136								· Missing numeric validation rules	This test does not cover date and quantity recognition features
137								· Incorrect assumption of user plan or action	This test does not cover input intent classification mechanisms
138	Neg_Fun_0009	Symbols converted to question	M	<><>	සිංහල අකුරුත් කොකොමැති දැනගන්න පුලුවන්ද ඕව	<><>	Fail	· Symbol-only input incorrectly generates a question	• This test does not cover question detection accuracy
139								· No logical mapping exists between input and output	This test does not cover symbol-to-meaning mapping validation
140								· Question intent is artificially created	This test does not cover multilingual punctuation handling
141								· Input validation rules are incomplete	This test does not cover profanity or harmful symbol filtering
142	Neg_UI_Fun_0010		M		හරියාකර හෙමින උත්තරය තරන්න		Fail	· The UI does not prevent submission of blank or whitespace-only input	This test does not coverHandling of mixed whitespace and special characters
143								· No proper validation message is displayed to guide the user	This test does not coverLocalization of UI validation messages across languages
144								· The system incorrectly treats empty input as valid data	This test does not coverAccessibility feedback (screen reader / ARIA alerts) for invalid input
145								· User feedback behavior does not align with expected usability standards	This test does not coverPerformance behavior for repeated invalid submissions
